

ENVIRONMENTAL POLICY

The company recognises that our operations have an effect on the environment. All staff needs to be actively involved and committed to this at all times for this approach to benefit the business, our clients and the environment.

To assist in realising this policy in practice, supporting environmental objectives have been determined by senior management and are monitored for achievement and consequently used to drive improvement initiatives, in general these being;

- Caring for the environment and taking all practicable steps to prevent pollution, minimising waste and use of raw materials ie “eliminate, reduce and recycle”.
- The efficient use of energy and reducing emissions.
- Meet relevant environmental legislation and applicable requirements.
- Working with suppliers to promote positive environmental actions.
- Periodic ‘targeted’ improvement of our environmental performance by setting objectives, actions and targets.
- Committing resource to help ensure objectives are met.
- Ensuring employees are trained to understand the policy and have the skills to implement it.
- Communicating our policy within our organisation and ensuring the availability of this policy to all stakeholders.
- Supporting the environmental policies and procedures of clients, and where we operate on client site, operating our business there in accord with applicable client standards.
